

smart command TM Tevolve.

Control your heating at the touch of an icon, from your smart phone, tablet or PC - available for Android or iOS.

Take control of your heating system remotely and start saving money with the latest Ducasa Smart-Command 'Tevolve' gateway. The gateway plugs into your internet router and communicates with the high quality Ducasa Avant DGi+ radiators, Colorado DGi+ towel rails and more.

Heat **where** you want it, **when** you want it

-  Multi-zone programming
-  App control
-  868 MHz MESH technology
-  Multi-home control
-  Consumption reports
-  Helps to reduce running costs

Free 'easy to use' Smart-Command 'Tevolve' App

Intuitive Smart-Command heating control

Programme individual radiators or group them together to produce heating zones, all at the touch of a button. Comfort, Economy and Frost protection temperatures can be set to your exact requirements and type of room, providing you with total control.

Unlike many systems on the market, the Smart-Command 'Tevolve' app receives and records information from the radiators, including energy use and room temperatures.

Reduce energy bills and take control

Use your mobile device to control temperatures and operating times while viewing energy consumption for each room in your home with our app.

ADVANCED ELECTRIC HEATING
ducasa

Colorado DGi+

Programmable electric towel rail

- 22.5C Digital control
- 24/7 programming
- App control
- Open window sensor
- Tamper proof
- Eco-Start self-learning
- Oil filled
- Frost, Economy, and Comfort modes

The technically advanced powder coated **Colorado DGi+** has a multitude of features including 24/7 programming with Comfort, Economy and Frost protection modes. With exceptional heat outputs, this high quality luxury towel rail will heat your bathroom as well as drying your towels all year round!

Available in 2 size options

750w

450w

Avant DGi+

Programmable electric radiator

Available in 2 low-level and 5 standard height sizes

Ducasa's **Avant DGi+** high quality cast aluminium radiator range combines good looks with top performance. Ideal for situations where different environments are required at different times, making them suitable for everyday modern living and also for rooms with little daytime use, second homes, rental properties or individual offices.

- Oil filled
- 24/7 programming
- App control
- Eco-Start self-learning
- Open window sensor
- Tamper proof
- Quick-fit brackets
- Frost, Economy, and Comfort modes

TP-220

Programmable thermostat

The Ducasa **Programmable Underfloor Thermostat & Switch** can be used to link other devices to the 'Tevolve' app. Although designed for underfloor electric heating, the underfloor or ambient temperature sensor can be disabled, making the **TP220** an app-controlled, programmable time switch. Ideal for integrating immersion heaters or other devices into the app controlled system, allowing for remote control and 24/hr programming at the touch of a button.
